

FIBRE NETWORKS / TELECOM INFRASTRUCTURE

Connecting *what comes next.*

Skilled people. Practical expertise. Infrastructure that brings networks to life.

ON THE GROUND. BUILT TO CONNECT.

01 / THE COMPANY

Built on experience. *Driven by connection.*

Founded in 2019, The Webji supports telecom companies in rolling out and maintaining networks rapidly and cost-effectively. Its services span telecom deployment, infrastructure operations and maintenance, backed by experienced field teams.

2019

Founded

250+

Skilled employees*

5,000

Buildings connected*

*As reported in the original profile. The building-connectivity figure refers to Maharashtra through December 2022; workforce figures are historical.

OPERATING FOOTPRINT

Maharashtra

Mumbai region and fibre connectivity across buildings in Maharashtra.

Gujarat

Telecom infrastructure and network field services.

The original profile listed Uttar Pradesh and Bangalore as future expansion plans for 2022. These are plans from that document, not confirmed operating locations.

PARTNERS FEATURED IN THE ORIGINAL PROFILE

Airtel**Tata Sky Broadband**

02 / OUR DIRECTION

A clear purpose. *A shared standard.*

OUR VISION

To become a leading telecommunications services company, delivering world-class service quality to customers.

OUR MISSION

Provide quality communication services and networking solutions for the evolving regional market through highly skilled, trained professionals. Deliver maximum value to customers and empower the team as the company's most prized asset.

THE VALUES THAT GUIDE US

■ Customer focus

Deliver value through responsive service.

■ Teamwork & communication

Work together with clarity and openness.

■ Creativity & flexibility

Adapt to changing requirements.

■ Ownership & responsibility

Be self-driven, results-oriented and environmentally conscious.

03 / OUR EXPERTISE

From first trench. *To final connection.*

Integrated field capabilities for telecom networks and the infrastructure behind them.

01

Fibre deployment

Specialised optical fibre cable (OFC) laying, cable routing, fibre termination and experienced rectification teams.

02

Operations & maintenance

Managed services, preventive maintenance, corrective maintenance, fault tracing and restoration.

03

Civil infrastructure

Experienced civil manpower, open-trenching teams, cable laying and infrastructure maintenance.

04

In-building services

In-building deployment (IBD) and fibre connectivity, supported by installation and termination teams.

05

Equipment rental

Telecom equipment on a rental basis, with testing, locating and field-support resources.

06

Project coordination

Critical-area execution, government liaison, site engineering, supervision and quality control.

04 / NETWORK CONTINUITY

Ready in the field. *Reliable in operation.*

The Webji provides field maintenance services supported by technical policies, procedures and quality systems designed for dependable results.

PREVENTIVE + CORRECTIVE MAINTENANCE

Routine care and restoration capability, working together.

- 01 Route patrollers**
On-ground monitoring of network routes.
- 02 Static guards**
Guarding support for telecom infrastructure.
- 03 Power systems**
Maintenance support for network power systems.
- 04 Equipment & spares**
Telecom spare-parts management and field support.
- 05 Fault tracing & restoration**
Identify faults and restore affected connections.

05 / PROJECT DELIVERY

Local knowledge. *Coordinated execution.*

Specialised OFC laying and operations and maintenance work, tailored to customer needs and supported by municipal and government liaison.

01

Plan & coordinate

Planning controls and reporting; customer management interface; flexible, proven processes.

02

Engineer for the site

Approved standard site configurations and site-specific engineering packages.

03

Supervise implementation

Implementation supervision, quality assurance and quality control.

04

Work responsibly

Environmental, health and safety practices on site throughout execution.

The original profile also highlights a breadth of experience and knowledge in telecommunications.

06 / FIELD RESOURCES

Equipped for *the work ahead.*

Testing, splicing, civil-work and response resources listed in the company's original equipment inventory.

EQUIPMENT	QUANTITY
Fusion splicing machine	12
OTDR	09
FRT vehicle	01
Civil vehicle	03
Laser light	50
Laser source	02
Cable locator	01
Core cutting machine	05
Digging breaker	02

Inventory quantities are reproduced from the original profile and are not represented as a current stock or availability statement.

Safe practices. *Stronger teams.*

Our objective is to conduct business in the safest possible manner, consistent with applicable occupational health and safety requirements.

01 A shared responsibility

Health and safety is considered for every employee. Attitude, cooperation and active participation in accident prevention help make job sites safer places to work.

02 Policy accountability

Disregard or wilful violation of the health and safety policy may result in disciplinary action in accordance with company policies.

03 Safety through execution

Environmental, health and safety considerations form part of the company's on-site project-delivery approach.

08 / RESPONSIBLE OPERATIONS

A lighter footprint. *A lasting commitment.*

The Webji recognises a responsibility to the environment beyond legal and regulatory requirements. Its policy commits to reducing environmental impact and continually improving performance as part of business strategy and operating methods.

POLICY PRIORITIES

■ **Compliance**

Comply with and aim to exceed relevant regulatory requirements.

■ **Improvement**

Monitor environmental performance and reduce environmental impacts.

■ **Decision-making**

Include environmental factors in business decisions.

■ **Awareness**

Increase employee awareness and training; encourage customers, suppliers and other stakeholders to act responsibly.

AREAS OF FOCUS

Paper / Energy and water / Office supplies

Transportation / Maintenance and cleaning

Monitoring and improvement / Culture

09 / LET'S CONNECT

Your next project. *Our next connection.*
